## PROFESSIONAL SUMMARY

Kubernetes-focused Cloud & DevOps Engineer specializing in building and operating scalable, production-grade platforms on AWS. Experienced in Kubernetes and Docker-based container orchestration, cluster design, and cloud-native architectures. Strong background in AWS infrastructure (EC2, S3, RDS, Lambda, VPC), Infrastructure as Code using Terraform and GitOps-driven CI/CD pipelines using GitHub Actions and ArgoCD. Proficient in monitoring and observability using Prometheus, Grafana, and CloudWatch, with a strong focus on reliability, automation, and incident response. Solid Linux foundation with Python and Bash scripting for infrastructure automation and cloud operations.

## CERTIFICATIONS

**AWS Certified Solutions Architect – Professional** | Amazon Web Services  
**Certified Kubernetes Administrator (CKA)** | Cloud Native Computing Foundation  
**Certified Kubernetes Application Developer (CKAD)** | Cloud Native Computing Foundation  
**Kubernetes and Cloud Security Associate (KCSA)** | Cloud Native Computing Foundation  
**Kubernetes and Cloud Native Associate (KCNA)** | Cloud Native Computing Foundation  
**HashiCorp Certified: Terraform Associate** | HashiCorp

## TECHNICAL SKILLS

**Containers & Orchestration** : Kubernetes, Docker, Helm, Amazon EKS, AWS Fargate  
**Cloud & AWS** : EC2, Auto Scaling, Application Load Balancer, VPC, Route 53, S3, RDS, Aurora, Lambda, EventBridge, IAM, Cognito, Secrets Manager, CloudFront, CloudWatch, AWS Budgets, SQS, SNS  
**Infrastructure as Code** : Terraform, AWS CloudFormation, Ansible  
**CI/CD & DevOps** : GitHub Actions, GitLab CI/CD, AWS CodePipeline, Argo CD, GitOps workflows  
**Monitoring & Observability** : Prometheus, Grafana, CloudWatch, OpenTelemetry, log aggregation, alerting  
**Security & DevSecOps** : IAM policies, least-privilege design, VPC security, secrets management  
**Scripting & Automation** : Python (automation, Lambda), Bash scripting  
**Linux & Systems** : Linux server administration, networking fundamentals, system troubleshooting, performance tuning

## EXPERIENCE

**Cloud & DevOps Engineer** | XamBook May 2024 – April 2026

- Designed, deployed, and operated a production-grade AWS platform using EC2, Auto Scaling, Application Load Balancer (ALB), VPC, Route 53, S3, and CloudFront.
- Automated infrastructure and application workflows using AWS Lambda, EventBridge, DynamoDB, CloudFormation.
- Implemented CI/CD pipelines using Git Actions for backend deployments and static asset delivery to S3 and CloudFront.
- Containerized application components using Docker and managed runtime reliability on EC2 with PM2 for zero-downtime.
- Implemented monitoring, logging, secrets management, and cost controls using CloudWatch, AWS Budgets, and AWS Secrets Manager.
- Handled ongoing cloud operations including scaling, patching, backups, and periodic security reviews.

## EDUCATION

Thiagarajar College of Engineering **Bachelor of Engineering (Mechanical Engineering)** | India May 2012 – May 2016

## PROJECTS

**KwantumZero – KwantumOS** | Open Source Live

- \* Building an operating system for learning quantum computing with preinstalled simulators and guided learning paths.

**brewbar – Python Package (PyPI)** | Open Source GitHub | PyPI

- \* Authored and published a lightweight Python progress-bar library with iterator-based API and MIT license. Implemented modern Python packaging using pyproject.toml and semantic versioning.

**Pinglo – LAN-First Chat Application** | Open Source GitHub

- \* Built a privacy-focused LAN-first chat application enabling real-time messaging without cloud dependency.
- \* Designed for low-latency, offline-first communication within local networks.

**harish8.com – Cloud Portfolio Platform** | AWS, Serverless Live

- \* Developed and deployed a React-based portfolio hosted on S3 and CloudFront.
- \* Implemented a serverless backend using AWS Lambda for dynamic functionality.

**DevBook & Sticky Notes – Web Tools** | JavaScript DevBook | Sticky Notes

- \* Built lightweight web tools focused on fast access, clean UI, and usability.
- \* Implemented responsive layouts and client-side interactions using HTML, CSS, and JavaScript.
